Brainstorm & idea prioritization

Our brainstorming sessions so your team can collaboratively explore ideas, understand real-world food ordering challenges, and shape the concept of **OrderOnTheGo (SB Foods)** into a simple, reliable, and scalable on-demand food ordering solution—even when team members are not physically present in the same location.

- **10 minutes** to prepare
- **1 hour** to collaborate
- **2-8 people** recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

A Team gathering
Team members involved in this session include developers, designers, and project stakeholders. The team shares real-life experiences related to online food ordering, late-night food availability, and delivery challenges to build a common understanding before brainstorming.

B Set the goal
The goal of this brainstorming session is to identify user problems and generate innovative ideas for building **OrderOnTheGo (SB Foods)**—a user-friendly food ordering platform that offers easy navigation, secure payments, and timely delivery.

C Learn how to use the facilitation tools
The team follows standard brainstorming rules such as encouraging open discussion, avoiding early judgment, listening to all ideas, and focusing on both creativity and feasibility to ensure a productive session.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

How might we create a simple and reliable food ordering platform that allows users to order food quickly, pay securely, and track deliveries in real time—especially during late-night hours?

Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

During this stage, all brainstormed ideas were reviewed and grouped based on similarity and relevance. The ideas were clustered to clearly identify core functional areas of the **OrderOnTheGo** platform. Each cluster represents a key aspect of the system.

User Experience & Convenience
Ideas related to easy navigation, quick checkout, clear food descriptions, transparent pricing, and real-time order updates were grouped under this category to enhance customer satisfaction.

Food Discovery & Availability
This cluster includes ideas focused on discovering nearby restaurants, late-night food availability, menu browsing, and filtering options to help users find food easily.

Payment & Security
Ideas involving secure online payments, multiple payment options, order confirmation, and data protection were grouped to ensure safe and reliable transactions.

Order Tracking & Delivery
This cluster contains ideas related to real-time order tracking, delivery status updates, and estimated delivery time to keep users informed throughout the order process.

Restaurant Management
Ideas such as adding and managing food items, viewing order history, updating order status, and monitoring sales were grouped to support efficient restaurant operations.

Admin & Platform Control
This group includes ideas related to admin dashboards, restaurant approvals, user management, and overall platform monitoring to ensure smooth system operation.

4 Prioritize

ining features and user types
- Creating a basic prototype
- Assigning tasks based on team strengths
