Develop shared understanding and empathy

This empathy map summarizes insights about users who rely on online food ordering platforms. It helps the team understand user behavior, emotions, challenges, and expectations to design a better food ordering experience.

WHO are we empathizing with?

- College students
- Working professionals
- Late-night food seekers
- Users with busy schedules and limited time to cook

GOAL

To order food easily and quickly

To receive food on time without hassle

To have a smooth, stress-free ordering experience

What do they need to DO?

What do they need to do differently?
What job(s) do they want or need to get done?
What decision(s) do they need to make?
How will we know they were successful?

What do they HEAR?

- Friends recommending food delivery apps
- Online reviews about fast or delayed deliveries
- Promotions and advertisements for food apps

What do they THINK and FEEL?

PAINS

- Hungry and tired after work or study
- Frustrated by complicated ordering steps
- Anxious about delivery delays
- Confused by unclear pricing or extra charges

GAINS

- Wants comfort and convenience
- Needs reliable food availability, even late at night
- Expects transparency in pricing and delivery time
- Desires a simple and easy-to-use app

What other thoughts and feelings might influence their behavior?

What do they SEE?

- Multiple food apps with crowded interfaces
- Limited restaurant options during late-night hours
- Offers, discounts, and popular food items

What do they SAY?

- "I want food quickly."
- "The ordering process should be simple."
- "Delivery should not take too long."
- "Prices should be clear."

What do they DO?

- Browse food apps when hungry
- Compare prices and delivery times
- Place orders online instead of cooking
- Track the order status frequently
